

# WETLAND RESTORATION WORKSHOP

Ball State University's Field Station and Environmental Education Center is hosting this hands-on workshop to demonstrate practical, low-cost techniques to create or restore natural and native wetland habitats. Participants learn to select suitable locations, test soil texture, choose appropriate construction techniques, work with heavy equipment operators, and select and establish native wetland plants.

Renowned instructor, Tom Biebighauser, teaches wetland restoration workshops worldwide. Participants actively engage in design and construction of natural-appearing and functioning wetlands.
