Register online:

<https://pfqf.myeventscenter.com/event/Illinois-Chorus-Frog-Wetland-Workshop-72808>

*SPACE IS LIMITED. Registration closes Feb 27, 2023
or when workshop capacity is reached.*

This hands-on wetland restoration workshop offers attendees the unique experience of building a wetland with world renowned wetland restoration expert, Tom Biebighauser! We will discover how to select locations for building wetlands, test soil texture, choose appropriate construction techniques, work with heavy equipment operators, and establish native plants. Throughout the workshop we will create a grassland wetland complex for the benefit of a diverse group of species including migratory birds, quail, pollinators, and of course the state threatened Illinois Chorus Frog.

Attendees will have the opportunity to join an evening frog survey, tour Partners for Fish and Wildlife hill prairie restoration sites, and enjoy a cookout with Pheasants Forever and Quail Forever Farm Bill Biologists.

Workshop details, including lodging information and agenda will be provided to registered participants.
