work on invasive species:

- Protect the West from the introduction of new invasive species through enhanced biosecurity practices, preparedness, and planning;
- Improve cross-boundary collaboration and coordination for the management of established and emerging invasive species;
- Empower state and federal agencies to manage invasive species by aligning federal laws, regulations, and funding mechanisms with states' needs;
- Support and utilize biosecurity research, technology and planning tools; and
- Standardize and mobilize invasive species data.

Climate Change + Catastrophic Fire Reduces Tree Recruitment

A new study in PNAS showed how forest communities are shifting with climate change and disturbance. The authors showed reductions in recruitment rates in lower-elevation Douglas Fir and Ponderosa Pine ecosystems after stand replacing fire. This has implications for post-fire restoration.
